

# Penataquit Creek

## Gibson Street

This site is at the park South of Gibson Street in Bay Shore. Parking is available in a public lot North of Gibson. From the park there is a concrete wall that provides easy access to view the West side of the creek, just as it flows out of the culvert. It is a very tidal site and visibility is often poor. There is an alternate site North of Montauk where a step pool leads into the culvert - this site has clearer water, but visibility may be poor due to turbulence.
