
Connetquot River Main Stem

There are two observation sites on the main stem of the Connetquot River. The north site is Bubbles Falls, a DEC fishing site close to the Sunrise Highway eastbound service road with adequate parking. Be careful when standing on the headwalls to look into the calm water and when walking along Sunrise Highway service road (picture on right).

The south site is on Biltmore Avenue, and is south of the LIRR tracks. There is a small pull-off just beyond the bridge to park. Look in the pool on the north side of the road (there is a fence blocking the view south). The water is calm and easy to see into (picture on left).
